MINERAL COATINGS

MicroQuarz
by **ecoresinas**

CONTINUOUS MINERAL COATING

MicroQuarz® is
a sustainable
continuous
mineral coating

MicroQuarz® is characterised by the application of several layers of a mineral mortar that constitute a natural finish, with a cementitious appearance where the design of the artisan decorator can be appreciated. **It is more flexible, waterproof and easier to apply than conventional microcement.**

MicroQuarz® with the possibility of designs: smooth, cloudy or structured, matt, satin or gloss.

MicroQuarz® is not a microcement

- **It is more flexible** than microcement, ideal for situations where there is flexion in the floor slabs.
- **More sustainable** than microcement, with low VOC content and without cement.
- **More waterproof** than microcement, we can use it on exterior façades without the need to use a varnish to waterproof it
- **It is anti-mould**, ideal for situations where there is damp due to condensation and in bathrooms.

MicroQuarz® is an elegant and functional solution for your construction or renovation projects

MicroQuarz® is an innovative product that offers a pleasant tactile experience in its finish. Unlike other cold surfaces, MicroQuarz® feels warm to the touch, making it the ideal choice for indoor situations where comfort is maximised.

Its soft and warm texture creates a cosy atmosphere that invites you to relax and enjoy the space.

It is the perfect choice for those looking to combine comfort with beauty and durability.

Design your **spaces to measure**

With a natural finish, it is a continuous wall and floor covering where you can choose from a wide range of colours, metallic finishes, textures and designs where imagination is your universe. It can be applied both indoors and outdoors.

MicroQuarz® PROPERTIES

- Ideal solution for vertical and horizontal surfaces and furniture.
- Suitable for shower areas.
- It can be applied directly on any type of support: plaster, mortar, cement, ceramic, plasterboard, stoneware, etc.
- Maximum thickness of 3 millimetres.
- Wide range of colours and infinite finishing effects.
- Water-based mineral product.
- Quick application without building work, indoors and outdoors.
- Matt, satin and gloss finishes.
- Suitable for facades.
- Suitable for application on underfloor heating.

Range of **MicroQuarz®** Systems

MicroQuarz® CLASSIC

A classic that does not go out of styles

It is used in refurbishments and new buildings. In recent years it has become a material in great demand by architects and interior designers.

- Adherence
- Impermeability
- Flexibility
- Low thickness

A smooth and uniform finish can be achieved where no water or textures can be seen. Or on the contrary, it is possible to achieve all the textures and waters that our creativity can lead us to.

MicroQuarz® *Nature*

The natural essence
of polished concrete

MicroQuarz® Nature is formulated to create a surface with the look of polished concrete. Without the need to make a high thickness concrete.

You can also achieve textures, designs with templates and unique colour combinations that will make the difference in your walls and floors.

MicroQuarz® Hard Transit

For high traffic floors

MicroQuarz® Hard Transit, is designed for high-traffic spaces. It has increased scratch resistance and can withstand dense flow. Compared to MicroQuarz® Classic, it has a more uniform and lightly textured appearance.

You can combine the five decorative elements: Earth, Wood, Fire, Water or Metal with our 48-colour MicroQuarz® colour chart. Ideal for extending your designs on floors, stairs, countertops, furniture and walls

MicroQuarz® Terra• Unity is strength

MicroQuarz® Terra combines all the advantages of MicroQuarz® with a balanced selection of coloured particles, expanding the design possibilities in continuous floor, wall and furniture coverings. At only 3 mm thick, MicroQuarz® Terra is the perfect element to renovate any room in the home.

MicroQuarz® Hard Transit XL

The strength of nature

MicroQuarz® Hard Transit XL focuses on its mineral composition to achieve the most demanding results in a continuous coating. Strength, resilience and natural heart in a single concept.

- > 3 times more robust spherical quartz
- > More mineral texture
- > No need to apply Finish Primer
- > Finish Radiant can be applied by troweling

STRONG

Its strength is due to its unique composition, which gives it exceptional resistance. The choice of a spherical quartz contributes to a better distribution of the loads resulting in a higher compressive strength than its little brother MicroQuarz® Hard Transit.

RESISTANT

The quartz selected for the MicroQuarz® Hard Transit XL is three times more robust than the traditional version, this variation gives it greater resistance to abrasion, ideal for demanding situations.

NATURAL

MicroQuarz® Hard Transit XL, has a soft and comfortable texture, but at the same time lets you feel its mineral core when you touch it. The strength of quartz is present in its surface and gives it the most mineral texture of the entire MicroQuarz® Hard Transit XL range.

Spaces of inspiration

MicroQuarz®

is waterproof
and very hygienic

BATHROOMS

EASY AND FAST APPLICATION

MicroQuarz® can be applied directly to almost any surface, thus avoiding the need to remove the base material. In this way, we do not generate debris, noise or the always annoying dust. In addition, it reduces application times by 70% compared to traditional microcement, allowing us to have a cleaner work sooner.

HEALTHY BATHROOM

Spaces coated with **MicroQuarz®** are continuously applied, so that the lack of joints prevents the accumulation of dirt and mould.

ADVANTAGES OF **MicroQuarz®** IN THE BATHROOM

- Easy to renew or change as MicroQuarz® can change colour by applying another coat.
- Easy to clean. A damp cloth will do the job. It is seamless and mould-free.
- Only a few millimetres of thickness are lost.
- No heavy machinery is required for installation.

MicroQuarz®

security
and resistance
in the kitchen

KITCHENS

EASY MAINTENANCE

MicroQuarz® does not need seals, which makes it very easy to maintain. The only requirement is to always use PH-neutral cleaning products, including kitchen degreasers or floor cleaners.

It is not recommended to use aggressive products such as ammonia or other agents that may attack the protective layer of the coatings.

ADVANTAGES OF **MicroQuarz®** IN THE KITCHEN

- There is no need for major building work to install it.
- It allows us to give colour to the kitchen in a multitude of shades and textures.
- Maximum hygiene. As it is continuously applied, it has no joints and avoids the accumulation of dirt.
- It is heat resistant. Ideal for the front of the worktop.

MicroQuarz®

creates continuity
in the spaces
giving the sensation
of greater amplitude

FLOORS

A MATERIAL THAT TOTALLY PERSONALISES ENVIRONMENTS

With **MicroQuarz®** you can personalise your floors and walls so that they fit in perfectly with the rest of the decoration.

You can choose between colours, textures and metallics. All this, together with the decorator's inspiration, will give charm and warmth to your rooms.

Choose neutral colours
is a good option
for space that **do not**
go out of style

MicroQuartz® is a
good heat transmitter.
And it is perfect for
floors with radiant
heating systems

 - Finish W TRP Radiant

A photograph of a modern interior room. On the left, a light-colored wooden shelf holds a dark, slender vase containing a single, long, thin, dried plant. The background is a large wall covered in a textured, multi-colored mural depicting a landscape with rolling hills, a body of water, and distant mountains under a clear sky. The overall aesthetic is minimalist and contemporary.

Unique walls
that attract attention

WALLS

WALLS COME TO LIFE

A **smooth balance** between
matter and a metallised
effect for your walls
and floors

WALLS

Gel Metallic Effect

A PERFECT FINISH

Water-based polyurethane gel, available in metallic colors, ideal for glazes that provide a deep and natural look to the most artistic creations on walls and floors.

Also used as a metallic coating in decorative applications for walls and floors.

PROPERTIES

- Easy application
- Washable
- Water-based product
- Great decorative value
- Easy cleaning

MicroQuarz® is a sustainable and environmentally responsible material

**We are a company committed to the
preservation of the environment.**

All our products are water-based and do not release any type of polluting vapour into the atmosphere during application.

Furthermore, with the application of **MicroQuarz®**, as it is not necessary to remove tiles, we avoid a large amount of debris, contributing to the environmental cause.

MicroQuarz® is ready to use and does not generate waste on site that can affect the accumulation of waste.

Colour chart

48 READY TO USE COLOURS

MicroQuarz® is available in 48 colours.

From pastel colours to intense shades, and different shades can be mixed on the same surface to achieve wonderful effects.

* Bespoke and custom colours available in NSC and RAL colours.
